

Bottoms Up 5.0

Round 1 Submission Guidelines

AI for Consulting: Prompt Engineering Business Case Challenge

Welcome to **Bottoms Up 5.0 – AI for Consulting**, where strategy meets the power of Artificial Intelligence.

Round 1 is designed to evaluate a participant's ability to leverage **Generative AI as a strategic consulting assistant**. Rather than testing prompt writing alone, this challenge assesses how effectively teams can use AI to analyse a business case, synthesize insights, and arrive at a practical, structured, and impactful recommendation.

Consultants today increasingly use AI to accelerate research and ideation while applying human judgment to formulate business recommendations. This challenge simulates that modern consulting workflow.

Challenge Overview

Each registered team will receive **one common business case** in PDF format.

Teams must use **only one of the approved AI platforms** to analyse the case and prepare a consulting recommendation.

The objective is to demonstrate:

- Structured problem solving
- Effective AI prompting
- Strategic thinking
- Business judgment
- Clear communication

Approved AI Platforms

Participants are permitted to use **only the following free versions**:

- ChatGPT (Free Version)
- Gemini (Free Version)

Use of any other AI platform or paid versions is strictly prohibited, including but not limited to:

- Claude
- Microsoft Copilot
- DeepSeek
- Perplexity
- Grok
- ChatGPT Plus
- Gemini Advanced
- Any custom GPTs or third-party AI assistants

Failure to comply may lead to disqualification.

Document Structure

Page 1 – Team Information

Include the following details:

Team Name

College Name

Team Members

- Member 1
- Member 2
- Member 3

AI Platform Used

Select one:

☐ ChatGPT (Free)

☐ Gemini (Free)

Declaration

We hereby declare that this submission has been prepared using only the approved AI platform as per the competition guidelines. The prompts submitted are an accurate representation of our interaction with the AI system.

Page 2 and 3 – Final Recommendation

The consulting recommendation should summarize your team's final solution.

Word Limit

Minimum: **1000 words**

Maximum: **1500 words**

The recommendation should be concise, evidence-driven, and professionally structured.

Participants are encouraged to include:

- Executive Summary
- Problem Identification
- Root Cause Analysis
- Strategic Recommendations
- Implementation Roadmap
- Expected Business Impact

Participants may also include (Optional):

- Tables
- SWOT Analysis
- Decision Matrices
- Business Frameworks
- Process Diagrams
- Charts

These visual elements **must be created manually by the participants.**

AI-generated images, graphics, or illustrations are strictly prohibited.

Page 3 End – Prompt Log

This page should contain the link to the Prompt log used in ChatGPT/Gemini

Procedure (ChatGPT):

- Navigate to the top right of the screen containing the prompt chat.
- Click on Share. The link will be automatically copied to clipboard.
- Paste that link at the bottom of Page 3.

Procedure (Gemini):

- Navigate to the top right of the screen containing three vertical dots.
- Click on the dots and then click on share conversation. A shareable public link will be generated.
- Copy and paste that link at the bottom of Page 3.

Failure to produce the conversation history upon request may result in disqualification.

AI Usage Policy

Participants are encouraged to explore prompt engineering techniques within the following guidelines.

Permitted

- ✓ Prompt refinement and iteration
 - ✓ Chain-of-Thought prompting
 - ✓ Multiple prompt attempts
 - ✓ Asking the AI to summarize, compare, analyze, or synthesize information from the provided case
 - ✓ Building recommendations through successive prompts
-

Not Permitted

✗ Role Prompting

Examples:

- "Act as a McKinsey Consultant"
- "Pretend you are the CEO"
- "You are a Bain Partner"

✗ Uploading the case PDF into the AI platform

Participants must manually interpret the case and provide relevant context through prompts.

✗ Asking follow-up questions about the case to the AI

Examples:

- "What assumptions should I make?"
- "Can you infer missing data?"

- "Ask me questions before answering."

✗ Using AI-generated images

✗ Using AI to create diagrams or charts

✗ Using any AI platform other than ChatGPT Free or Gemini Free

Submission Requirements

Each team must submit **one PDF document consisting of exactly three pages.**

File Naming Convention: *Please check the submission form*

Formatting Guidelines

- Document Format: PDF
- Number of Pages: Exactly 3
- Font: Calibri / Aptos / Arial
- Font Size: 11 or 12
- Line Spacing: 1.15 or 1.5
- Margins: Standard (1 inch)
- Page Numbers: Optional

Submissions exceeding three pages will not be evaluated beyond Page 3.

Evaluation Criteria

Evaluation Parameter	Weightage
Understanding of the Business Problem	20%
Strategic Quality of Recommendation	35%
Prompt Engineering Approach	20%
Practicality & Feasibility	15%
Clarity, Structure & Communication	10%
Total:	100%

Academic Integrity

Any attempt to conceal prompts, fabricate interactions, or violate AI usage policies may result in immediate disqualification.

Submission Checklist

Before submitting, ensure that:

- Team consists of exactly three members
 - Only ChatGPT (Free) or Gemini (Free) has been used
 - Submission contains exactly three pages
 - Team information is complete
 - Recommendation is between 1000–1500 words
 - Prompt chat link is shared in Page 3.
 - No AI-generated images are included
 - All diagrams, tables, and frameworks are created manually
 - File name follows the prescribed convention
 - Submission is saved as PDF
-

Bottoms Up 5.0 – AI for Consulting

"Great consultants don't ask AI for answers—they ask better questions, challenge the outputs, and transform insights into impactful business decisions."

Remember, **AI is a consulting assistant—not the consultant**. Judges will evaluate your team's ability to use AI effectively while applying critical thinking and strategic decision-making.
